

Life Science **Logistics**

We enable the advancement of Life Sciences
through worldwide transport solutions.

Regional expertise. **Global scale.**

Trusted Life Science logistics. Worldwide.

Our solutions provide dependable transportation for CROs, hospitals, labs, universities, CDMOs and CTOs around the world, the backbone for their vital work in the development of new therapies for the pharmaceutical industry.

Combining reliable temperature control, constant real-time visibility, and GDP-compliant transport, our bespoke solutions are designed specifically to meet the exacting needs of the most precious cargo.

Reliable logistics for clinical development

Life Couriers helps Biopharma companies around the world bring new drugs to market through global clinical trial coordination and cold chain logistics.

Cryogenic transportation

Embryos, sperm, oocytes (eggs), blood, and cell lines: Life Couriers is here to provide stable and reliable dry shipper (cryogenic) transportation.

Optimal supply chains for research institutions

Life Couriers is dedicated to the coordination and successful transportation of research specimens on a global scale.

Logistics **for Life**

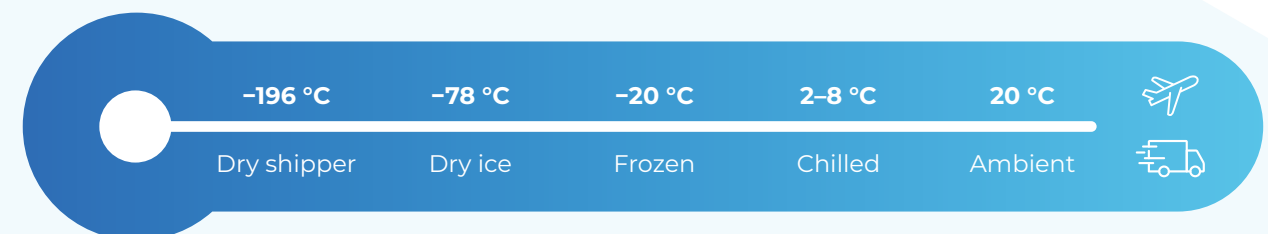

We deliver hope

At Life Couriers, we confront the greatest challenges in life science logistics, delivering lifesaving therapies, critical diagnostics and breakthrough clinical trials. Wherever logistics can make the biggest difference to a patient's life, you'll find us first.

As the worldwide market leader for radiopharma and stem cell logistics, we've taken this experience with the most time-critical shipments in the world to expand our services to biopharmaceuticals, cell and gene therapies, lab specimens, clinical trials, organ transplant, medical devices and more.

Consistent temperature control

We are the experts in temperature control, maintaining exacting standards during international transportation, with in-house packaging and temperature management combined with built-in contingency plans.

9 reasons to choose us as your Life Science logistics partner

24/7/365 visibility

Constant visibility of your shipment's location, temperature, and light via our growing network of Control Towers.

Superior temperature control

Cryogenic, dry ice, frozen, chilled or ambient. Thermo-containers by renowned manufacturers. Full monitoring documentation.

GDP-compliant transport

All shipping requirements are precisely translated into a bespoke logistics solution that complies with Good Distribution Practice.

Optimal packaging

We offer optimal packaging and monitoring solutions for all conceivable requirements.

Precious cargo, carefully handled

All shipping goods are handled carefully and professionally according to the respective requirements.

Consultation and regulatory guidance

Our team works around the clock to make sure your shipment arrives on time.

Dedicated international customs team

We support your team in clearing customs easily and effectively.

Flexible pick-up and delivery options

Whether it is a direct pick-up, a specific delivery window or dedicated delivery contacts, we work to your requirements.

Contingency plans

There is no room for error in Life Science logistics. We always have plans in place to manage unpredictable events.
